

LAKE Groomer

WWW.LAKEGROOMER.COM

No weeds. No muck. No labor. **Just sit back and enjoy your beach!**

Say Goodbye to Weeds and Muck!

With Lake Groomer, you'll spend less time maintaining your lake shore and more time enjoying it! Lake Groomer's rolling action dislodges weeds and cleans loose sediment for a weed-free and muck-free beach without the need for harsh chemicals.

Lake Groomer is simple to install and can stand alone or mount to a dock. Position Lake Groomer wherever you want to control weeds and muck for improved boat access and a swimming area your whole family will love!

Experience the **Lake Groomer** Difference

Power Share Program

Use the Power Share program with your neighbors! Lake Groomer can be purchased without the power unit. This allows several neighbors to easily move one power unit to different Lake Groomer installations, making the Lake Groomer an even better investment for all.

Stay Dry Installation

Lake Groomer's unique installation system features a single bracket to the dock and a base anchor that is augured from above, so you can install Lake Groomer without ever getting into the water!

For reduced weight and easier handling, you can remove the drive head before installing, then reattach once Lake Groomer is in place.

Triple Protection Against Short Circuit

1. Plug into ground fault at the source.
2. Ground fault built into unit.
3. Short circuit protection in the motor controller.

Standard Specifications

- Adjustable, up to a 280 degree arc.
- Operates in up to 4.5 ft of water at the power head.
- Extendable to 42 ft of lake bottom rollers.
- 3 degrees of flex for each roller joint (9 degrees total with 3 rollers).

Comparison Guide

	Weed Roller	Lake Groomer
Max Height with Extension Kit	9.5 ft	10.5 ft
Length of Radius Assembled	21 ft	21 ft
Auto Reverse Sensing	Yes	Yes
Power	0.067 hp	0.167 hp
Extension Kit Depth	2.5 ft	3 ft
Number of Flexible Couplers	2	3
Installation	2 brackets - 1 submerged	1 bracket
Warranty	2 years	3 years or 12,000 cycles

Easy Coupler Installation

Three flexible couplers between the rollers allow Lake Groomer to follow the contour of the lake bottom. Just one bolt is required to attach or detach the rollers, so changing your roller configuration is simple!

Adjustable Roller Arc

The roller path can cover an arc up to 280 degrees, and is easily adjusted with the directional pucks. When they reach the end of their set arc, the rollers will automatically reverse and continue rolling.

Programmable Cycles

Lake Groomer can be programmed to run a desired number of cycles, then power off. With this great feature, you can set it and forget it!

Lake Groomer Parts & Accessories

Lake Groomer (700100)

Includes upper drive unit, lower drive assembly, three 7 ft rollers, square and round u-bolts for connecting to dock and all hardware necessary for assembly and installation.

Lake Groomer without Upper Drive Unit (700204)
